JOURNAL OF MOLECULAR CATALYSIS A: CHEMICAL

Author Index

Altomare, A., see Braca, G. (107) 113
Anpo, M., see Matsuoka, M. (107) 399
Arribas, G., see Braca, G. (107) 113
Asakura, K., see Chun, W.-J. (107) 55
Avnir, D., see Blum, J. (107) 217
Balulescu, M., see Herdan, J.-M. (107) 409
Basset, J.-M., see Santini, C.C. (107) 263
Baudoul, F., Borcy, A., Mommerency, S., Vanderwegen, P. and Jannes, G.
The influence of water on cyanide displacement of 1-halobutanes using 18-crown-6 ether as phase transfer catalyst (107) 351
Beena, B., Shivanekar, A. and Chudasama, U.
Catalytic activity of Pd(II) sorbed on an inorganic ion exchanger — zirconium molybdate (107) 347
Beregszászi, T., see Török, B. (107) 305
Bernaerts, D., see Fonseca, A. (107) 159
Bethell, D., see Feast, S. (107) 291
Bhattacharyya, N.K., see King, R.B. (107) 145
Bischoff, S., Weigt, A., Mießner, H. and Lücke, B.
Soluble and supported carbonylation catalysts derived from rhodium–phosphonate–phosphane complexes (107) 339
Blaser, H.-U., Jalett, H.-P. and Spindler, F.
Enantioselective hydrogenation of α-ketoesters: comparison of homogeneous and heterogeneous catalysts (107) 85
Block, J.H., see Smirnov, M.Y. (107) 359
Blum, J., Rosenfeld, A., Polak, N., Israelson, O., Schumann, H. and Avnir, D.
Comparison between homogeneous and sol–gel-encapsulated rhodium-quaternary ammonium ion pair catalysts (107) 217
B.Nagy, J., see Fonseca, A. (107) 159
Borcy, A., see Baudoul, F. (107) 351
Borsari, M., see Zucchi, C. (107) 313
Braca, G., Sbrana, G., Raspolli-Galletti, A.M., Altomare, A., Arribas, G., Michelotti, M. and Ciardelli, F.
Supported transition metal complexes for ethylene polymerization (107) 113
Brody, J.F., see Johnson, J.W. (107) 67
Bucsi, I., see Török, B. (107) 305
Chandwadkar, A.J., see Das, T.Kr. (107) 199
Chateau, L., Hindermann, J.P., Kiennemann, A. and Tempesti, E.
On the mechanism of carbonylation in acetic acid and higher acid synthesis from methanol and syngas mixtures on supported rhodium catalysts (107) 367
Che, M., see Garrot, J.-M. (107) 137
Chesnokov, N.V., see Kovalchuk, V.I. (107) 329
Chudasama, U., see Beena, B. (107) 347
Chun, W.-J., Shirai, M., Tomishige, K., Asakura, K. and Iwasawa, Y.
PTRF X-ray absorption fine structure as a new technique for catalyst characterization (107) 55
Ciardelli, F., see Braca, G. (107) 113
Cira, O., see Herdan, J.-M. (107) 409
Corma, A., Fuerte, A., Iglesias, M. and Sánchez, F.
Preparation of new chiral dioxomolybdenum complexes heterogenised on modified USY-zeolites. Efficient catalysts for selective epoxidation of allylic alcohols (107) 225
Cornia, A., see Zucchi, C. (107) 313
Coucouvanis, D., Demadis, K.D., Malinak, S.M., Mosier, P.E., Tyson, M.A. and Laughlin, L.J.
Catalytic and stoichiometric multielectron reduction of hydrazine to ammonia and acetylene to ethylene with clusters that contain the MFe_3S_4 cores (M = Mo, V). Relevance to the function of nitrogenase (107) 123
Court, J., see Gil, A. (107) 185
Cozzi, F., see Fusi, A. (107) 255
Cunningham, R.H., Mangnus, A.V.G., Van Grondelle, J. and Van Santen, R.A.
Production of ^{11}C-labelled n-hexane for use in positron emission imaging (107) 153
Das, T.Kr., Chandwadkar, A.J. and Sivasanker, S.
Studies on the synthesis, characterization and catalytic properties of the large pore titanosilicate, ETS-10 (107) 199
De Goldwasser, M.R., see Pérez Zurita, M.J. (107) 175
Del Castillo, H.L., see Gil, A. (107) 185
Demadis, K.D., see Coucouvanis, D. (107) 123
Dossi, C., see Fusi, A. (107) 255
Dossi, C., see Ugo, R. (107) 13
Emde, S., see Schmid, G. (107) 95
Fabretti, A.C., see Zucchi, C. (107) 313
Feast, S., Bethell, D., Page, P.C.B., King, F., Rochester, C.H., Siddiqui, M.R.H., Willock, D.J. and Hutchings, G.J.
Enantioselection using modified zeolite catalysts (107) 291
Finiels, A., Geneste, P. and Moreau, C.
Transfer of concepts from homogeneous to heterogeneous catalysis: use of Hammett relationships to assess reaction mechanisms and nature of active sites in reactions catalyzed by sulfides, metals, clays and zeolites (107) 385
Fonseca, A., Hernadi, K., B.Nagy, J., Bernaerts, D. and Lucas, A.A.
Optimization of catalytic production and purification of buckytubes (107) 159

Forni, A., Moretti, I., Prati, F. and Torre, G.
Microbial synthesis of (+) and (−) methyl 4-chloro-4,4-difluoro-3-hydroxybutanoate (107) 405
Fuerte, A., see Corma, A. (107) 225
Fukuoka, A., Minami, Y., Nakajima, N., Hirano, M. and Komiya, S.
Synthesis and reactivity of organoplatinum–rhenium heterobimetallic complexes having sulfur ligands (107) 323
Fusi, A., Psaro, R., Dossi, C., Garlaschelli, L. and Cozzi, F.
A molecular approach to heterogeneous catalysis. Ethylene hydroformylation catalysed by silica-supported $[Rh_{12}(CO)_{30}]^{2-}$ cluster anion: influence of the countercations Li^+, Na^+, K^+, Zn (107) 255
García, J.J., see Pérez Zurita, M.J. (107) 175
Garlaschelli, L., see Fusi, A. (107) 255
Garrot, J.-M., Lepetit, C. and Che, M.
Comparison of extended-Hückel and ab initio calculations in predicting the hapticity of benzene in silica-supported Ni^1 complexes (107) 137
Gates, W.E., see Johnson, J.W. (107) 67
Gatteschi, D., see Zucchi, C. (107) 313
Gavioli, G., see Zucchi, C. (107) 313
Geneste, P., see Finiels, A. (107) 385
Gil, A., Del Castillo, H.L., Masson, J., Court, J. and Grange, P.
Selective dehydration of 1-phenylethanol to 3-oxa-2,4-diphenylpentane on titanium pillared montmorillonite (107) 185
Gőbölös, S., see Guczi, L. (107) 1
Gorodetskii, V.V., see Smimov, M.Y. (107) 359
Grange, P., see Gil, A. (107) 185
Guczi, L., Gőbölös, S. and Pályi, G.
A Special Volume containing papers presented at the 8th International Symposium on Relations between Homogeneous and Heterogeneous Catalysis, held in Balatonfüred, Hungary, September 10–14, 1995 (107) 1
Hegedu, M., see Margitfalvi, J.L. (107) 281
Herdan, J.-M., Balulescu, M. and Cira, O.
Enantioselective hydrolysis of racemic esters using pig liver esterase (107) 409
Hernadi, K., see Fonseca, A. (107) 159
Hidai, M. and Ishii, Y.
Toward direct synthesis of organo-nitrogen compounds from molecular nitrogen (107) 105
Hindermann, J.P., see Chateau, L. (107) 367
Hirano, M., see Fukuoka, A. (107) 323
Hutchings, G.J., see Feast, S. (107) 291
Ichikawa, M., Pan, W., Imada, Y., Yamaguchi, M., Isobe, K. and Shido, T.
Surface-grafted metal oxide clusters and metal carbonyl clusters in zeolite micropores; XAFS/FTIR/TPD characterization and catalytic behavior (107) 23
Ichikuni, N., see Shimazu, S. (107) 297
Iglesias, M., see Corma, A. (107) 225
Imada, Y., see Ichikawa, M. (107) 23
Ishii, Y., see Hidai, M. (107) 105
Isobe, K., see Ichikawa, M. (107) 23
Israelson, O., see Blum, J. (107) 217
Iwasawa, Y., see Chun, W.-J. (107) 55
Jalett, H.-P., see Blaser, H.-U. (107) 85
Jannes, G., see Baudoul, F. (107) 351
Jansen, R.J.J., Van Veldhuizen, H.M. and Van Bekkum, H.
Heteropoly anion on carbon: characterization and use in 2,3,6-trimethylphenol oxidation (107) 241
Johnson, J.W., Brody, J.F., Soled, S.L., Gates, W.E., Robbins, J.L. and Marucchi-Soos, E.
Controlling the chemistry of the micropore volume in pillared clays and micas (107) 67
Kapocsi, I., see Török, B. (107) 305

Journal of Molecular Catalysis A: Chemical 107 (1996) 419–426

JOURNAL OF MOLECULAR CATALYSIS A: CHEMICAL

Subject Index

Acetic acid
Methanol; Carbonylation; Carboxylic acids; Rhodium catalysts; Mechanism (Chateau, L. (107) 367)

Acetylacetonate
Macrocomplexes; Water-soluble catalyst; Oxidation; Hydroformylation; Dipyridyl; Phosphine ligands (Karakhanov, E.A. (107) 235)

Active sites
Hammett relationships; Mechanisms; Sulphides; Metals; Clays; Zeolites (Finiels, A. (107) 385)

Activity of ETS-10
ETS-10 synthesis; Templates for ETS-10; Characterization of ETS-10; Titanosilicate (ETS) molecular sieves (Das, T.Kr. (107) 199)

Adsorbate structure
Chemisorption; Flexible surface; Surface structure; Metal surface (Somorjai, G.A. (107) 39)

Alkene
Enantioselectivity; Hydrogenation; Immobilization; Diphosphine; Rhodium; Iridium; Imine (Pugin, B. (107) 273)

Alkyl complexes
Metal complexes; Model; Complex; Intermediates (Moss, J.R. (107) 169)

Alumina
Platinum; α-Keto esters; Cinchonidine; Enantio-differentiation; Hydrogenation; Ethyl pyruvate; Shielding effect (Margitfalvi, J.L. (107) 281)

Ammonia
Nuclear waste; Noble metals; Rhodium; Hydrogen; Reduction (King, R.B. (107) 145)

Anisotropic structure analysis
X-ray absorption fine structure (XAFS); Chamber in situ XAFS; Asymmetric structure analysis; Orientation of surface bonds; Surfaces (Chun, W.-J. (107) 55)

Arylation
Nitrogen; Tungsten; Molybdenum; Heterocycles; Silylation; Silylamines (Hidai, M. (107) 105)

Asymmetric reduction
Microbial reduction; Stereochemical control; Chiral esters; Fluoro-β-hydroxyesters (Forni, A. (107) 405)

Asymmetric structure analysis
X-ray absorption fine structure (XAFS); Chamber in situ XAFS; Anisotropic structure analysis; Orientation of surface bonds; Surfaces (Chun, W.-J. (107) 55)

η^2-Benzene
Nickel; Silica surface; Extended Hückel calculations; Density functional theory; Local density approach; Non-local density approach; DMol (Garrot, J.-M. (107) 137)

Buckytubes
Carbon nanotubes; Catalytic synthesis; Silica support; Zeolite support; Co-catalyst; Fe-catalyst (Fonseca, A. (107) 159)

Butene
Palladium; Heteropolyanions; Wacker oxidation (Stobbe-Kreemers, A.W. (107) 247)

Carbon monoxide
Iron; Pillared clays; Zeolite shape selectivity; Selectivity; Hydrogenation (Pérez Zurita, M.J. (107) 175)
Carbonyl clusters; Surface chemistry; Organometallic chemistry; Hydrogenation; Hydroformylation; Supported clusters; Propylene (Kovalchuk, V.I. (107) 329)

Carbon nanotubes
Buckytubes; Catalytic synthesis; Silica support; Zeolite support; Co-catalyst; Fe-catalyst (Fonseca, A. (107) 159)

Carbonylation
Phosphonate–phosphanes; Hemilabile catalysts; Rhodium; Methanol; Phosphane complexes; Supported catalysts (Bischoff, S. (107) 339)
Methanol; Acetic acid; Carboxylic acids; Rhodium catalysts; Mechanism (Chateau, L. (107) 367)

Carbonyl clusters
Surface chemistry; Organometallic chemistry; Carbon monoxide; Hydrogenation; Hydroformylation; Supported clusters; Propylene (Kovalchuk, V.I. (107) 329)

Carboxylic acids
Hydrogenation; Esters; Unsaturated fatty acids; Rhodium; Phosphine complexes; Smectites; Supported catalysts (Shimazu, S. (107) 297)
Methanol; Carbonylation; Acetic acid; Rhodium catalysts; Mechanism (Chateau, L. (107) 367)

Catalysis
Zirconium molybdate; Heterogenised homogeneous catalysis (Beena, B. (107) 347)

Catalytic carbonylation
Catalytic oxidation; Redox molecular sieves; Ship-in-the-bottle catalysts; Organometallic catalysis in water; Supported aqueous phase catalysis; Enantioselective catalysis (Sheldon, R.A. (107) 75)

Catalytic oxidation
Redox molecular sieves; Ship-in-the-bottle catalysts; Catalytic carbonylation; Organometallic catalysis in water; Supported aqueous phase catalysis; Enantioselective catalysis (Sheldon, R.A. (107) 75)
Catalytic synthesis
Buckytubes; Carbon nanotubes; Silica support; Zeolite support; Co-catalyst; Fe-catalyst (Fonseca, A. (107) 159)
Chamber in situ XAFS
X-ray absorption fine structure (XAFS); Asymmetric structure analysis; Anisotropic structure analysis; Orientation of surface bonds; Surfaces (Chun, W.-J. (107) 55)
Characterization of ETS-10
ETS-10 synthesis; Templates for ETS-10; Activity of ETS-10; Titanosilicate (ETS) molecular sieves (Das, T.Kr. (107) 199)
Chemisorption
Flexible surface; Surface structure; Metal surface; Adsorbate structure (Somorjai, G.A. (107) 39)
Chiral esters
Asymmetric reduction; Microbial reduction; Stereochemical control; Fluoro-β-hydroxyesters (Forni, A. (107) 405)
Cinchona modified catalysts
Enantioselectivity; Hydrogenation; α-Ketoesters; (*R*)-α-Hydroxyesters; Rhodium diphosphine complexes; Platinum; Solvent effects; Process development (Blaser, H.-U. (107) 85)
Cinchonidine
Hydrogenation; Palladium; Phenanthroline; Supported catalysts (Schmid, G. (107) 95)
Platinum; Alumina; α-Keto esters; Enantio-differentiation; Hydrogenation; Ethyl pyruvate; Shielding effect (Margitfalvi, J.L. (107) 281)
^{11}C-labelled hexane
Isotope production; Hexane; Positron emission imaging (Cunningham, R.H. (107) 153)
Clays
Hammett relationships; Mechanisms; Active sites; Sulphides; Metals; Zeolites (Finiels, A. (107) 385)
Cluster complexes
Cyclooligosiloxanolate clusters; Lanthanides; Siloxanolate; Transition metals (Zucchi, C. (107) 313)
Cluster-derived rhodium catalyst
Promotion effect; Hydroformylation; Ethylene; Silica (Fusi, A. (107) 255)
Co-catalyst
Buckytubes; Carbon nanotubes; Catalytic synthesis; Silica support; Zeolite support; Fe-catalyst (Fonseca, A. (107) 159)
Complex
Metal complexes; Alkyl complexes; Model; Intermediates (Moss, J.R. (107) 169)
Crown ethers
Water; Cyanide; Halobutanes; Phase transfer catalysis (Baudoul, F. (107) 351)
Cyanide
Water; Halobutanes; Crown ethers; Phase transfer catalysis (Baudoul, F. (107) 351)
Cyclodehydration
Heteropoly acids; Diols; Pinacol rearrangement (Török, B. (107) 305)
Cyclooligosiloxanolate clusters
Cluster complexes; Lanthanides; Siloxanolate; Transition metals (Zucchi, C. (107) 313)
Decomposition
Photocatalysis; Nitric oxide; Silver; Zeolite (Matsuoka, M. (107) 399)
Dehydration
1-Phenylethanol; Pillared clay; Titanium (Gil, A. (107) 185)
Density functional theory
Nickel; η^2-Benzene; Silica surface; Extended Hückel calculations; Local density approach; Non-local density approach; DMol (Garrot, J.-M. (107) 137)
Diffuse layer
Homogeneous catalysis; Heterogeneous catalysis; Electrooxidation; $RuCl_3$; $Ru(acac)_3$; Oxidation; Tetrabutylammonium dichromate; 2-Methylnaphthalene; Diisobutylamine; Electrochemistry; 2-Methylnaphthoquinone (Michman, M. (107) 393)
Diisobutylamine
Homogeneous catalysis; Heterogeneous catalysis; Electrooxidation; $RuCl_3$; $Ru(acac)_3$; Oxidation; Tetrabutylammonium dichromate; 2-Methylnaphthalene; Diffuse layer; Electrochemistry; 2-Methylnaphthoquinone (Michman, M. (107) 393)
Diisocyanide ligands
Radiation; Polymers; Ruthenium (Tannenbaum, R. (107) 207)
Diols
Heteropoly acids; Pinacol rearrangement; Cyclodehydration (Török, B. (107) 305)
Diphosphine
Enantioselectivity; Hydrogenation; Immobilization; Rhodium; Iridium; Alkene; Imine (Pugin, B. (107) 273)
Dipyridyl
Macrocomplexes; Water-soluble catalyst; Oxidation; Hydroformylation; Acetylacetonate; Phosphine ligands (Karakhanov, E.A. (107) 235)
DMol
Nickel; η^2-Benzene; Silica surface; Extended Hückel calculations; Density functional theory; Local density approach; Non-local density approach (Garrot, J.-M. (107) 137)
Electrochemistry
Homogeneous catalysis; Heterogeneous catalysis; Electrooxidation; $RuCl_3$; $Ru(acac)_3$; Oxidation; Tetrabutylammonium dichromate; 2-Methylnaphthalene; Diisobutylamine; Diffuse layer; 2-Methylnaphthoquinone (Michman, M. (107) 393)
Electrooxidation
Homogeneous catalysis; Heterogeneous catalysis; $RuCl_3$; $Ru(acac)_3$; Oxidation; Tetrabutylammonium dichromate; 2-Methylnaphthalene; Diisobutylamine; Diffuse layer; Electrochemistry; 2-Methylnaphthoquinone (Michman, M. (107) 393)
Enantio-differentiation
Platinum; Alumina; α-Keto esters; Cinchonidine; Hydrogenation; Ethyl pyruvate; Shielding effect (Margitfalvi, J.L. (107) 281)
Enantioselective catalysis
Catalytic oxidation; Redox molecular sieves; Ship-in-the-bottle catalysts; Catalytic carbonylation; Organometallic catalysis in water; Supported aqueous phase catalysis (Sheldon, R.A. (107) 75)

Enantioselectivity
Hydrogenation; α-Ketoesters; (*R*)-α-Hydroxyesters; Rhodium diphosphine complexes; Cinchona modified catalysts; Platinum; Solvent effects; Process development (Blaser, H.-U. (107) 85)
Hydrogenation; Immobilization; Diphosphine; Rhodium; Iridium; Alkene; Imine (Pugin, B. (107) 273)
Immobilized enzymes; Pig liver esterase; Hydrolysis (Herdan, J.-M. (107) 409)

Esters
Hydrogenation; Carboxylic acids; Unsaturated fatty acids; Rhodium; Phosphine complexes; Smectites; Supported catalysts (Shimazu, S. (107) 297)

Ethylene
Metallocenes; $MgCl_2$; Nickel; Polymerization; Polystyrene supports; Supported catalysts; Titanium; Ylide complexes; Zeolite; Zirconium complexes (Braca, G. (107) 113)
Promotion effect; Hydroformylation; Cluster-derived rhodium catalyst; Silica (Fusi, A. (107) 255)

Ethyl pyruvate
Platinum; Alumina; α-Keto esters; Cinchonidine; Enantio-differentiation; Hydrogenation; Shielding effect (Margitfalvi, J.L. (107) 281)

ETS-10 synthesis
Templates for ETS-10; Characterization of ETS-10; Activity of ETS-10; Titanosilicate (ETS) molecular sieves (Das, T.Kr. (107) 199)

Extended Hückel calculations
Nickel; η^2-Benzene; Silica surface; Density functional theory; Local density approach; Non-local density approach; DMol (Garrot, J.-M. (107) 137)

Fe-catalyst
Buckytubes; Carbon nanotubes; Catalytic synthesis; Silica support; Zeolite support; Co-catalyst (Fonseca, A. (107) 159)

Flexible surface
Chemisorption; Surface structure; Metal surface; Adsorbate structure (Somorjai, G.A. (107) 39)

Fluoro-β-hydroxyesters
Asymmetric reduction; Microbial reduction; Stereochemical control; Chiral esters (Forni, A. (107) 405)

FTIR spectroscopy
Heteropoly anion; Molybdovanadophosphate; Modified carbon; 2,3,6-Trimethylphenol; Oxidation; Molecular oxygen (Jansen, R.J.J. (107) 241)

Halobutanes
Water; Cyanide; Crown ethers; Phase transfer catalysis (Baudoul, F. (107) 351)

Hammett relationships
Mechanisms; Active sites; Sulphides; Metals; Clays; Zeolites (Finiels, A. (107) 385)

β-H elimination
Naphtha reforming; Heterobimetallic complex; Platinum–rhenium; Ligand effect (Fukuoka, A. (107) 323)

Hemilabile catalysts
Phosphonate–phosphanes; Rhodium; Methanol; Carbonylation; Phosphane complexes; Supported catalysts (Bischoff, S. (107) 339)

Heterobimetallic complex
Naphtha reforming; Platinum–rhenium; Ligand effect; β-H elimination (Fukuoka, A. (107) 323)

Heterocycles
Nitrogen; Tungsten; Molybdenum; Arylation; Silylation; Silylamines (Hidai, M. (107) 105)

Heterogeneous catalysis
Homogeneous catalysis; Electrooxidation; $RuCl_3$; $Ru(acac)_3$; Oxidation; Tetrabutylammonium dichromate; 2-Methylnaphthalene; Diisobutylamine; Diffuse layer; Electrochemistry; 2-Methylnaphthoquinone (Michman, M. (107) 393)

Heterogenised homogeneous catalysis
Zirconium molybdate; Catalysis (Beena, B. (107) 347)

Heteropoly acids
Diols; Pinacol rearrangement; Cyclodehydration (Török, B. (107) 305)

Heteropoly anion
Molybdovanadophosphate; Modified carbon; 2,3,6-Trimethylphenol; Oxidation; Molecular oxygen; FTIR spectroscopy (Jansen, R.J.J. (107) 241)

Heteropolyanions
Palladium; Wacker oxidation; Butene (Stobbe-Kreemers, A.W. (107) 247)

Hexane
Isotope production; ^{11}C-labelled hexane; Positron emission imaging (Cunningham, R.H. (107) 153)

Homogeneous catalysis
Heterogeneous catalysis; Electrooxidation; $RuCl_3$; $Ru(acac)_3$; Oxidation; Tetrabutylammonium dichromate; 2-Methylnaphthalene; Diisobutylamine; Diffuse layer; Electrochemistry; 2-Methylnaphthoquinone (Michman, M. (107) 393)

Hydroformylation
Immobilized catalysts; Hydrogenation; Rhodium; Sol–gel (Blum, J. (107) 217)
Macrocomplexes; Water-soluble catalyst; Oxidation; Dipyridyl; Acetylacetonate; Phosphine ligands (Karakhanov, E.A. (107) 235)
Promotion effect; Ethylene; Cluster-derived rhodium catalyst; Silica (Fusi, A. (107) 255)
Carbonyl clusters; Surface chemistry; Organometallic chemistry; Carbon monoxide; Hydrogenation; Supported clusters; Propylene (Kovalchuk, V.I. (107) 329)

Hydrogen
Nuclear waste; Noble metals; Rhodium; Ammonia; Reduction (King, R.B. (107) 145)
Platinum; Nitric oxide; Oxygen; Surface carbon; Mechanisms; Monocrystal surface; Surface intermediates (Smirnov, M.Y. (107) 359)

Hydrogenation
Enantioselectivity; α-Ketoesters; (*R*)-α-Hydroxyesters; Rhodium diphosphine complexes; Cinchona modified catalysts; Platinum; Solvent effects; Process development (Blaser, H.-U. (107) 85)
Cinchonidine; Palladium; Phenanthroline; Supported catalysts (Schmid, G. (107) 95)
Iron; Pillared clays; Zeolite shape selectivity; Selectivity; Carbon monoxide (Pérez Zurita, M.J. (107) 175)

Immobilized catalysts; Hydroformylation; Rhodium; Sol–gel (Blum, J. (107) 217)
Enantioselectivity; Immobilization; Diphosphine; Rhodium; Iridium; Alkene; Imine (Pugin, B. (107) 273)
Platinum; Alumina; α-Keto esters; Cinchonidine; Enantio-differentiation; Ethyl pyruvate; Shielding effect (Margitfalvi, J.L. (107) 281)
Carboxylic acids; Esters; Unsaturated fatty acids; Rhodium; Phosphine complexes; Smectites; Supported catalysts (Shimazu, S. (107) 297)
Carbonyl clusters; Surface chemistry; Organometallic chemistry; Carbon monoxide; Hydroformylation; Supported clusters; Propylene (Kovalchuk, V.I. (107) 329)

Hydrolysis
Immobilized enzymes; Pig liver esterase; Enantioselectivity (Herdan, J.-M. (107) 409)

(*R*)-α-Hydroxyesters
Enantioselectivity; Hydrogenation; α-Ketoesters; Rhodium diphosphine complexes; Cinchona modified catalysts; Platinum; Solvent effects; Process development (Blaser, H.-U. (107) 85)

Hydroxyl groups
Metal–support interactions; Rhodium; Silica; Supported catalysts (Santini, C.C. (107) 263)

Imine
Enantioselectivity; Hydrogenation; Immobilization; Diphosphine; Rhodium; Iridium; Alkene (Pugin, B. (107) 273)

Immobilization
Enantioselectivity; Hydrogenation; Diphosphine; Rhodium; Iridium; Alkene; Imine (Pugin, B. (107) 273)

Immobilized catalysts
Hydroformylation; Hydrogenation; Rhodium; Sol–gel (Blum, J. (107) 217)

Immobilized enzymes
Pig liver esterase; Enantioselectivity; Hydrolysis (Herdan, J.-M. (107) 409)

Inorganic oxides
Tailored metal catalysts; Zeolites; Metal carbonyl clusters; Volatile complexes; Organometallic complexes (Ugo, R. (107) 13)

Intermediates
Metal complexes; Alkyl complexes; Model; Complex (Moss, J.R. (107) 169)

Iridium
Enantioselectivity; Hydrogenation; Immobilization; Diphosphine; Rhodium; Alkene; Imine (Pugin, B. (107) 273)

Iron
Pillared clays; Zeolite shape selectivity; Selectivity; Carbon monoxide; Hydrogenation (Pérez Zurita, M.J. (107) 175)

Isotope production
^{11}C-labelled hexane; Hexane; Positron emission imaging (Cunningham, R.H. (107) 153)

α-Ketoesters
Enantioselectivity; Hydrogenation; (*R*)-α-Hydroxyesters; Rhodium diphosphine complexes; Cinchona modified catalysts; Platinum; Solvent effects; Process development (Blaser, H.-U. (107) 85)

α-Keto esters
Platinum; Alumina; Cinchonidine; Enantio-differentiation; Hydrogenation; Ethyl pyruvate; Shielding effect (Margitfalvi, J.L. (107) 281)

Lanthanides
Cluster complexes; Cyclooligosiloxanolate clusters; Siloxanolate; Transition metals (Zucchi, C. (107) 313)

Ligand effect
Naphtha reforming; Heterobimetallic complex; Platinum–rhenium; β-H elimination (Fukuoka, A. (107) 323)

Local density approach
Nickel; η^2-Benzene; Silica surface; Extended Hückel calculations; Density functional theory; Non-local density approach; DMol (Garrot, J.-M. (107) 137)

Macrocomplexes
Water-soluble catalyst; Oxidation; Hydroformylation; Dipyridyl; Acetylacetonate; Phosphine ligands (Karakhanov, E.A. (107) 235)

Mechanism
Methanol; Carbonylation; Acetic acid; Carboxylic acids; Rhodium catalysts (Chateau, L. (107) 367)

Mechanisms
Platinum; Nitric oxide; Oxygen; Hydrogen; Surface carbon; Monocrystal surface; Surface intermediates (Smirnov, M.Y. (107) 359)
Hammett relationships; Active sites; Sulphides; Metals; Clays; Zeolites (Finiels, A. (107) 385)

Metal carbonyl clusters
Tailored metal catalysts; Inorganic oxides; Zeolites; Volatile complexes; Organometallic complexes (Ugo, R. (107) 13)

Metal complexes
Alkyl complexes; Model; Complex; Intermediates (Moss, J.R. (107) 169)

Metallocenes
Ethylene; $MgCl_2$; Nickel; Polymerization; Polystyrene supports; Supported catalysts; Titanium; Ylide complexes; Zeolite; Zirconium complexes (Braca, G. (107) 113)

Metals
Hammett relationships; Mechanisms; Active sites; Sulphides; Clays; Zeolites (Finiels, A. (107) 385)

Metal–support interactions
Hydroxyl groups; Rhodium; Silica; Supported catalysts (Santini, C.C. (107) 263)

Metal surface
Chemisorption; Flexible surface; Surface structure; Adsorbate structure (Somorjai, G.A. (107) 39)

Methanol
Phosphonate–phosphanes; Hemilabile catalysts; Rhodium; Carbonylation; Phosphane complexes; Supported catalysts (Bischoff, S. (107) 339)
Carbonylation; Acetic acid; Carboxylic acids; Rhodium catalysts; Mechanism (Chateau, L. (107) 367)

2-Methylnaphthalene
Homogeneous catalysis; Heterogeneous catalysis; Electrooxidation; $RuCl_3$; $Ru(acac)_3$; Oxidation; Tetrabutylammonium dichromate; Diisobutylamine; Diffuse layer; Electrochemistry; 2-Methylnaphthoquinone (Michman, M. (107) 393)

2-Methylnaphthoquinone
Homogeneous catalysis; Heterogeneous catalysis; Electrooxidation; $RuCl_3$; $Ru(acac)_3$; Oxidation; Tetrabutylammonium dichromate; 2-Methylnaphthalene; Diisobutylamine; Diffuse layer; Electrochemistry (Michman, M. (107) 393)
$MgCl_2$
Ethylene; Metallocenes; Nickel; Polymerization; Polystyrene supports; Supported catalysts; Titanium; Ylide complexes; Zeolite; Zirconium complexes (Braca, G. (107) 113)
Micas
Micropore volume; Pillared clays; Zirconia (Johnson, J.W. (107) 67)
Microbial reduction
Asymmetric reduction; Stereochemical control; Chiral esters; Fluoro-β-hydroxyesters (Forni, A. (107) 405)
Micropore volume
Pillared clays; Micas; Zirconia (Johnson, J.W. (107) 67)
Model
Metal complexes; Alkyl complexes; Complex; Intermediates (Moss, J.R. (107) 169)
Modified carbon
Heteropoly anion; Molybdovanadophosphate; 2,3,6-Trimethylphenol; Oxidation; Molecular oxygen; FTIR spectroscopy (Jansen, R.J.J. (107) 241)
Molecular oxygen
Heteropoly anion; Molybdovanadophosphate; Modified carbon; 2,3,6-Trimethylphenol; Oxidation; FTIR spectroscopy (Jansen, R.J.J. (107) 241)
Molybdenum
Nitrogen; Tungsten; Heterocycles; Arylation; Silylation; Silylamines (Hidai, M. (107) 105)
Molybdovanadophosphate
Heteropoly anion; Modified carbon; 2,3,6-Trimethylphenol; Oxidation; Molecular oxygen; FTIR spectroscopy (Jansen, R.J.J. (107) 241)
^{95}Mo NMR chemical shift
Oxygen atom transfer (Teruel, H. (107) 379)
Monocrystal surface
Platinum; Nitric oxide; Oxygen; Hydrogen; Surface carbon; Mechanisms; Surface intermediates (Smirnov, M.Y. (107) 359)
Naphtha reforming
Heterobimetallic complex; Platinum–rhenium; Ligand effect; β-H elimination (Fukuoka, A. (107) 323)
Nickel
Ethylene; Metallocenes; $MgCl_2$; Polymerization; Polystyrene supports; Supported catalysts; Titanium; Ylide complexes; Zeolite; Zirconium complexes (Braca, G. (107) 113)
η^2-Benzene; Silica surface; Extended Hückel calculations; Density functional theory; Local density approach; Non-local density approach; DMol (Garrot, J.-M. (107) 137)
Nitric oxide
Platinum; Oxygen; Hydrogen; Surface carbon; Mechanisms; Monocrystal surface; Surface intermediates (Smirnov, M.Y. (107) 359)
Photocatalysis; Decomposition; Silver; Zeolite (Matsuoka, M. (107) 399)
Nitrogen
Tungsten; Molybdenum; Heterocycles; Arylation; Silylation; Silylamines (Hidai, M. (107) 105)
Noble metals
Nuclear waste; Rhodium; Hydrogen; Ammonia; Reduction (King, R.B. (107) 145)
Non-local density approach
Nickel; η^2-Benzene; Silica surface; Extended Hückel calculations; Density functional theory; Local density approach; DMol (Garrot, J.-M. (107) 137)
Nuclear waste
Noble metals; Rhodium; Hydrogen; Ammonia; Reduction (King, R.B. (107) 145)
Organometallic catalysis in water
Catalytic oxidation; Redox molecular sieves; Ship-in-the-bottle catalysts; Catalytic carbonylation; Supported aqueous phase catalysis; Enantioselective catalysis (Sheldon, R.A. (107) 75)
Organometallic chemistry
Carbonyl clusters; Surface chemistry; Carbon monoxide; Hydrogenation; Hydroformylation; Supported clusters; Propylene (Kovalchuk, V.I. (107) 329)
Organometallic complexes
Tailored metal catalysts; Inorganic oxides; Zeolites; Metal carbonyl clusters; Volatile complexes (Ugo, R. (107) 13)
Orientation of surface bonds
X-ray absorption fine structure (XAFS); Chamber in situ XAFS; Asymmetric structure analysis; Anisotropic structure analysis; Surfaces (Chun, W.-J. (107) 55)
Oxidation
Macrocomplexes; Water-soluble catalyst; Hydroformylation; Dipyridyl; Acetylacetonate; Phosphine ligands (Karakhanov, E.A. (107) 235)
Heteropoly anion; Molybdovanadophosphate; Modified carbon; 2,3,6-Trimethylphenol; Molecular oxygen; FTIR spectroscopy (Jansen, R.J.J. (107) 241)
Homogeneous catalysis; Heterogeneous catalysis; Electrooxidation; $RuCl_3$; $Ru(acac)_3$; Tetrabutylammonium dichromate; 2-Methylnaphthalene; Diisobutylamine; Diffuse layer; Electrochemistry; 2-Methylnaphthoquinone (Michman, M. (107) 393)
Oxygen
Platinum; Nitric oxide; Hydrogen; Surface carbon; Mechanisms; Monocrystal surface; Surface intermediates (Smirnov, M.Y. (107) 359)
Oxygen atom transfer
^{95}Mo NMR chemical shift (Teruel, H. (107) 379)
Palladium
Cinchonidine; Hydrogenation; Phenanthroline; Supported catalysts (Schmid, G. (107) 95)
Heteropolyanions; Wacker oxidation; Butene (Stobbe-Kreemers, A.W. (107) 247)
Phase transfer catalysis
Water; Cyanide; Halobutanes; Crown ethers (Baudoul, F. (107) 351)
Phenanthroline
Cinchonidine; Hydrogenation; Palladium; Supported catalysts (Schmid, G. (107) 95)
1-Phenylethanol
Dehydration; Pillared clay; Titanium (Gil, A. (107) 185)
Phosphane complexes
Phosphonate–phosphanes; Hemilabile catalysts; Rhodium; Methanol; Carbonylation; Supported catalysts (Bischoff, S. (107) 339)

Phosphine complexes
Hydrogenation; Carboxylic acids; Esters; Unsaturated fatty acids; Rhodium; Smectites; Supported catalysts (Shimazu, S. (107) 297)
Phosphine ligands
Macrocomplexes; Water-soluble catalyst; Oxidation; Hydroformylation; Dipyridyl; Acetylacetonate (Karakhanov, E.A. (107) 235)
Phosphonate–phosphanes
Hemilabile catalysts; Rhodium; Methanol; Carbonylation; Phosphane complexes; Supported catalysts (Bischoff, S. (107) 339)
Photocatalysis
Nitric oxide; Decomposition; Silver; Zeolite (Matsuoka, M. (107) 399)
Pig liver esterase
Immobilized enzymes; Enantioselectivity; Hydrolysis (Herdan, J.-M. (107) 409)
Pillared clay
Dehydration; 1-Phenylethanol; Titanium (Gil, A. (107) 185)
Pillared clays
Micropore volume; Micas; Zirconia (Johnson, J.W. (107) 67)
Iron; Zeolite shape selectivity; Selectivity; Carbon monoxide; Hydrogenation (Pérez Zurita, M.J. (107) 175)
Pinacol rearrangement
Heteropoly acids; Diols; Cyclodehydration (Török, B. (107) 305)
Platinum
Enantioselectivity; Hydrogenation; α-Ketoesters; (*R*)-α-Hydroxyesters; Rhodium diphosphine complexes; Cinchona modified catalysts; Solvent effects; Process development (Blaser, H.-U. (107) 85)
Alumina; α-Keto esters; Cinchonidine; Enantio-differentiation; Hydrogenation; Ethyl pyruvate; Shielding effect (Margitfalvi, J.L. (107) 281)
Nitric oxide; Oxygen; Hydrogen; Surface carbon; Mechanisms; Monocrystal surface; Surface intermediates (Smirnov, M.Y. (107) 359)
Platinum–rhenium
Naphtha reforming; Heterobimetallic complex; Ligand effect; β-H elimination (Fukuoka, A. (107) 323)
Polymerization
Ethylene; Metallocenes; $MgCl_2$; Nickel; Polystyrene supports; Supported catalysts; Titanium; Ylide complexes; Zeolite; Zirconium complexes (Braca, G. (107) 113)
Polymers
Radiation; Ruthenium; Diisocyanide ligands (Tannenbaum, R. (107) 207)
Polystyrene supports
Ethylene; Metallocenes; $MgCl_2$; Nickel; Polymerization; Supported catalysts; Titanium; Ylide complexes; Zeolite; Zirconium complexes (Braca, G. (107) 113)
Positron emission imaging
Isotope production; ^{11}C-labelled hexane; Hexane (Cunningham, R.H. (107) 153)
Process development
Enantioselectivity; Hydrogenation; α-Ketoesters; (*R*)-α-Hydroxyesters; Rhodium diphosphine complexes; Cinchona modified catalysts; Platinum; Solvent effects (Blaser, H.-U. (107) 85)
Promotion effect
Hydroformylation; Ethylene; Cluster-derived rhodium catalyst; Silica (Fusi, A. (107) 255)
Propylene
Carbonyl clusters; Surface chemistry; Organometallic chemistry; Carbon monoxide; Hydrogenation; Hydroformylation; Supported clusters (Kovalchuk, V.I. (107) 329)
Quantum chemistry
Transition metals; Zeolites (Van Santen, R.A. (107) 5)
Radiation
Polymers; Ruthenium; Diisocyanide ligands (Tannenbaum, R. (107) 207)
Redox molecular sieves
Catalytic oxidation; Ship-in-the-bottle catalysts; Catalytic carbonylation; Organometallic catalysis in water; Supported aqueous phase catalysis; Enantioselective catalysis (Sheldon, R.A. (107) 75)
Reduction
Nuclear waste; Noble metals; Rhodium; Hydrogen; Ammonia (King, R.B. (107) 145)
Rhodium
Nuclear waste; Noble metals; Hydrogen; Ammonia; Reduction (King, R.B. (107) 145)
Immobilized catalysts; Hydroformylation; Hydrogenation; Sol–gel (Blum, J. (107) 217)
Hydroxyl groups; Metal–support interactions; Silica; Supported catalysts (Santini, C.C. (107) 263)
Enantioselectivity; Hydrogenation; Immobilization; Diphosphine; Iridium; Alkene; Imine (Pugin, B. (107) 273)
Hydrogenation; Carboxylic acids; Esters; Unsaturated fatty acids; Phosphine complexes; Smectites; Supported catalysts (Shimazu, S. (107) 297)
Phosphonate–phosphanes; Hemilabile catalysts; Methanol; Carbonylation; Phosphane complexes; Supported catalysts (Bischoff, S. (107) 339)
Rhodium catalysts
Methanol; Carbonylation; Acetic acid; Carboxylic acids; Mechanism (Chateau, L. (107) 367)
Rhodium diphosphine complexes
Enantioselectivity; Hydrogenation; α-Ketoesters; (*R*)-α-Hydroxyesters; Cinchona modified catalysts; Platinum; Solvent effects; Process development (Blaser, H.-U. (107) 85)
$Ru(acac)_3$
Homogeneous catalysis; Heterogeneous catalysis; Electrooxidation; $RuCl_3$; Oxidation; Tetrabutylammonium dichromate; 2-Methylnaphthalene; Diisobutylamine; Diffuse layer; Electrochemistry; 2-Methylnaphthoquinone (Michman, M. (107) 393)
$RuCl_3$
Homogeneous catalysis; Heterogeneous catalysis; Electrooxidation; $Ru(acac)_3$; Oxidation; Tetrabutylammonium dichromate; 2-Methylnaphthalene; Diisobutylamine; Diffuse layer; Electrochemistry; 2-Methylnaphthoquinone (Michman, M. (107) 393)
Ruthenium
Radiation; Polymers; Diisocyanide ligands (Tannenbaum, R. (107) 207)
Selectivity
Iron; Pillared clays; Zeolite shape selectivity; Carbon monoxide; Hydrogenation (Pérez Zurita, M.J. (107) 175)

Shielding effect
Platinum; Alumina; α-Keto esters; Cinchonidine; Enantio-differentiation; Hydrogenation; Ethyl pyruvate (Margitfalvi, J.L. (107) 281)
Ship-in-the-bottle catalysts
Catalytic oxidation; Redox molecular sieves; Catalytic carbonylation; Organometallic catalysis in water; Supported aqueous phase catalysis; Enantioselective catalysis (Sheldon, R.A. (107) 75)
Silica
Promotion effect; Hydroformylation; Ethylene; Cluster-derived rhodium catalyst (Fusi, A. (107) 255)
Hydroxyl groups; Metal–support interactions; Rhodium; Supported catalysts (Santini, C.C. (107) 263)
Silica support
Buckytubes; Carbon nanotubes; Catalytic synthesis; Zeolite support; Co-catalyst; Fe-catalyst (Fonseca, A. (107) 159)
Silica surface
Nickel; η^2-Benzene; Extended Hückel calculations; Density functional theory; Local density approach; Non-local density approach; DMol (Garrot, J.-M. (107) 137)
Siloxanolate
Cluster complexes; Cyclooligosiloxanolate clusters; Lanthanides; Transition metals (Zucchi, C. (107) 313)
Silver
Photocatalysis; Nitric oxide; Decomposition; Zeolite (Matsuoka, M. (107) 399)
Silylamines
Nitrogen; Tungsten; Molybdenum; Heterocycles; Arylation; Silylation (Hidai, M. (107) 105)
Silylation
Nitrogen; Tungsten; Molybdenum; Heterocycles; Arylation; Silylamines (Hidai, M. (107) 105)
Smectites
Hydrogenation; Carboxylic acids; Esters; Unsaturated fatty acids; Rhodium; Phosphine complexes; Supported catalysts (Shimazu, S. (107) 297)
Sol–gel
Immobilized catalysts; Hydroformylation; Hydrogenation; Rhodium (Blum, J. (107) 217)
Solvent effects
Enantioselectivity; Hydrogenation; α-Ketoesters; (*R*)-α-Hydroxyesters; Rhodium diphosphine complexes; Cinchona modified catalysts; Platinum; Process development (Blaser, H.-U. (107) 85)
Stereochemical control
Asymmetric reduction; Microbial reduction; Chiral esters; Fluoro-β-hydroxyesters (Forni, A. (107) 405)
Sulphides
Hammett relationships; Mechanisms; Active sites; Metals; Clays; Zeolites (Finiels, A. (107) 385)
Supported aqueous phase catalysis
Catalytic oxidation; Redox molecular sieves; Ship-in-the-bottle catalysts; Catalytic carbonylation; Organometallic catalysis in water; Enantioselective catalysis (Sheldon, R.A. (107) 75)
Supported catalysts
Cinchonidine; Hydrogenation; Palladium; Phenanthroline (Schmid, G. (107) 95)
Ethylene; Metallocenes; $MgCl_2$; Nickel; Polymerization; Polystyrene supports; Titanium; Ylide complexes; Zeolite; Zirconium complexes (Braca, G. (107) 113)
Hydroxyl groups; Metal–support interactions; Rhodium; Silica (Santini, C.C. (107) 263)
Hydrogenation; Carboxylic acids; Esters; Unsaturated fatty acids; Rhodium; Phosphine complexes; Smectites (Shimazu, S. (107) 297)
Phosphonate–phosphanes; Hemilabile catalysts; Rhodium; Methanol; Carbonylation; Phosphane complexes (Bischoff, S. (107) 339)
Supported clusters
Carbonyl clusters; Surface chemistry; Organometallic chemistry; Carbon monoxide; Hydrogenation; Hydroformylation; Propylene (Kovalchuk, V.I. (107) 329)
Surface carbon
Platinum; Nitric oxide; Oxygen; Hydrogen; Mechanisms; Monocrystal surface; Surface intermediates (Smirnov, M.Y. (107) 359)
Surface chemistry
Carbonyl clusters; Organometallic chemistry; Carbon monoxide; Hydrogenation; Hydroformylation; Supported clusters; Propylene (Kovalchuk, V.I. (107) 329)
Surface intermediates
Platinum; Nitric oxide; Oxygen; Hydrogen; Surface carbon; Mechanisms; Monocrystal surface (Smirnov, M.Y. (107) 359)
Surfaces
X-ray absorption fine structure (XAFS); Chamber in situ XAFS; Asymmetric structure analysis; Anisotropic structure analysis; Orientation of surface bonds (Chun, W.-J. (107) 55)
Surface structure
Chemisorption; Flexible surface; Metal surface; Adsorbate structure (Somorjai, G.A. (107) 39)
Tailored metal catalysts
Inorganic oxides; Zeolites; Metal carbonyl clusters; Volatile complexes; Organometallic complexes (Ugo, R. (107) 13)
Templates for ETS-10
ETS-10 synthesis; Characterization of ETS-10; Activity of ETS-10; Titanosilicate (ETS) molecular sieves (Das, T.Kr. (107) 199)
Tetrabutylammonium dichromate
Homogeneous catalysis; Heterogeneous catalysis; Electrooxidation; $RuCl_3$; $Ru(acac)_3$; Oxidation; 2-Methylnaphthalene; Diisobutylamine; Diffuse layer; Electrochemistry; 2-Methylnaphthoquinone (Michman, M. (107) 393)
Titanium
Ethylene; Metallocenes; $MgCl_2$; Nickel; Polymerization; Polystyrene supports; Supported catalysts; Ylide complexes; Zeolite; Zirconium complexes (Braca, G. (107) 113)
Dehydration; 1-Phenylethanol; Pillared clay (Gil, A. (107) 185)
Titanosilicate (ETS) molecular sieves
ETS-10 synthesis; Templates for ETS-10; Characterization of ETS-10; Activity of ETS-10 (Das, T.Kr. (107) 199)
Transition metals
Quantum chemistry; Zeolites (Van Santen, R.A. (107) 5)
Cluster complexes; Cyclooligosiloxanolate clusters; Lanthanides; Siloxanolate (Zucchi, C. (107) 313)

2,3,6-Trimethylphenol
Heteropoly anion; Molybdovanadophosphate; Modified carbon; Oxidation; Molecular oxygen; FTIR spectroscopy (Jansen, R.J.J. (107) 241)
Tungsten
Nitrogen; Molybdenum; Heterocycles; Arylation; Silylation; Silylamines (Hidai, M. (107) 105)
Unsaturated fatty acids
Hydrogenation; Carboxylic acids; Esters; Rhodium; Phosphine complexes; Smectites; Supported catalysts (Shimazu, S. (107) 297)
Volatile complexes
Tailored metal catalysts; Inorganic oxides; Zeolites; Metal carbonyl clusters; Organometallic complexes (Ugo, R. (107) 13)
Wacker oxidation
Palladium; Heteropolyanions; Butene (Stobbe-Kreemers, A.W. (107) 247)
Water
Cyanide; Halobutanes; Crown ethers; Phase transfer catalysis (Baudoul, F. (107) 351)
Water-soluble catalyst
Macrocomplexes; Oxidation; Hydroformylation; Dipyridyl; Acetylacetonate; Phosphine ligands (Karakhanov, E.A. (107) 235)
X-ray absorption fine structure (XAFS)
Chamber in situ XAFS; Asymmetric structure analysis; Anisotropic structure analysis; Orientation of surface bonds; Surfaces (Chun, W.-J. (107) 55)
Ylide complexes
Ethylene; Metallocenes; $MgCl_2$; Nickel; Polymerization; Polystyrene supports; Supported catalysts; Titanium; Zeolite; Zirconium complexes (Braca, G. (107) 113)
Zeolite
Ethylene; Metallocenes; $MgCl_2$; Nickel; Polymerization; Polystyrene supports; Supported catalysts; Titanium; Ylide complexes; Zirconium complexes (Braca, G. (107) 113)
Photocatalysis; Nitric oxide; Decomposition; Silver (Matsuoka, M. (107) 399)
Zeolites
Quantum chemistry; Transition metals (Van Santen, R.A. (107) 5)
Tailored metal catalysts; Inorganic oxides; Metal carbonyl clusters; Volatile complexes; Organometallic complexes (Ugo, R. (107) 13)
Hammett relationships; Mechanisms; Active sites; Sulphides; Metals; Clays (Finiels, A. (107) 385)
Zeolite shape selectivity
Iron; Pillared clays; Selectivity; Carbon monoxide; Hydrogenation (Pérez Zurita, M.J. (107) 175)
Zeolite support
Buckytubes; Carbon nanotubes; Catalytic synthesis; Silica support; Co-catalyst; Fe-catalyst (Fonseca, A. (107) 159)
Zirconia
Micropore volume; Pillared clays; Micas (Johnson, J.W. (107) 67)
Zirconium complexes
Ethylene; Metallocenes; $MgCl_2$; Nickel; Polymerization; Polystyrene supports; Supported catalysts; Titanium; Ylide complexes; Zeolite (Braca, G. (107) 113)
Zirconium molybdate
Catalysis; Heterogenised homogeneous catalysis (Beena, B. (107) 347)
